ULTIMATE KRONOS GROUP

Job Application for Co-op Software Developer Internship

Dear Lindsye Proud,

About Me

I am a 4th-year computer science student at UBC with two co-op terms at RBC under my belt. My interests include full stack web development and machine learning.

Why UKG?

I am very inspired by UKG's people-centric culture and its message to put people first. Working at UKG will provide me with the necessary experience required to achieve my goal of becoming a full-stack software developer after I graduate.

Why Me?

I am a good fit for this role due to my attention to detail and excellent communication skills. Moreover, as for technical skills, my experience with JavaScript at RBC will be an asset. Furthermore, I am also familiar with Java as that is the first language I was taught at university. I will be available for a four-month co-op term over the summer. I look forward to hearing from you.

Sincerely,

Kanishka Verma
